Vehicle Checklist

You need to bring a safe, reliable vehicle for your road test. If it isn't safe or doesn't meet legal requirements, we may have to cancel your test.

10 most common reasons a vehicle might not be accepted for a road test:

1. Dash warning lights (for example, air bag) that affect the safe operation of the vehicle
2. Brake lights, signal lights or headlights not working or with badly cracked or missing lenses
3. Unsafe tires
4. Doors or windows not operating (for example, doors don't open from inside)
5. Cracked or illegally tinted windshield or windows
6. Horn not working
7. Gas tank or electric charge too low
8. Vehicle not properly licensed or insured
9. Seatbelts not working or frayed
10. Unsafe or illegal vehicle modifications
